This international project contains texts by editor Joanne Ehrich, a foreword by Deborah Tabart, Executive Director of the Australian Koala Foundation (AKF), and an afterword by Jack Hanna—America's favorite television naturalist and host of the "Jack Hanna's Animal Adventures" television series.

It features carefully selected camera sequences that make the animals come alive by suggesting movements, revealing a world rich with surprises. The photographs are arranged within sections that uncover different aspects of this marsupial. A portion of proceeds from sales of this book will benefit the AKF.
